9. The product meets industry standards for stability when used for its intended purpose in accordance with the instructions provided in the manual.
10. Use the product to support during stretching, using resistance straps, ropes or other means to be attached to it, may result in serious injury.

USE

For your own safety, regularly inspect your equipment.

- If you are a beginner, start training for several weeks using the options to get your body used to muscular work.
- Warm up before each session with a cardiovascular workout, sets without weights or warm-up and stretching ground exercises. Increase repetitions and sets gradually
- Perform all movements regularly and smoothly.
- Always keep your back straight. Avoid arching or rounding your back during movement.
- When you perform a bench press, your eyes must be under the bar.
- The two stands must be aligned during practice. You can adjust the distance between the two stands according to your body shape.

For a beginner, work in sets of 10 to 15 repetitions, generally 4 sets per exercise with a minimum recovery time between each set (this recovery time can be defined by your doctor during your check-up). Alternate muscle groups.

Do not work all the muscles every day but instead spread your training over several days.
